

Komal Gana Naga Soma Sai Manoj Mathamsetti

Sricity, Andhra Pradesh
komalmathamsetti@gmail.com — +91 8885489886 — GitHub — LeetCode

Summary

ECE undergraduate at IIIT Sri City (CGPA: 8.43) with strong interest in Software Development. Skilled in C++, Data Structures & Algorithms, and full-stack development (React, Node.js). Actively building real-world projects and seeking SDE internship opportunities.

Education

Indian Institute of Information Technology, Sri City B.Tech in Electronics and Communication Engineering CGPA: 8.43/10	2023 – 2027
Tirumala Junior College Intermediate Percentage: 97.2%	2021 – 2023

Skills

- **Languages:** C++, JavaScript, Python
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, OS, CN
- **Web:** React.js, Node.js, Express.js, REST APIs, HTML, CSS
- **Embedded Systems/IoT:** Arduino Uno, ESP32, Sensor Integration
- **Databases:** PostgreSQL
- **Tools:** Git, GitHub, Postman

Projects

Book Exchange Platform

React, Node.js, Express.js, PostgreSQL, JWT, Tailwind CSS

- Built a full-stack marketplace platform for students to exchange academic books.
- Implemented secure authentication using JWT and bcrypt password hashing.
- Designed REST APIs for CRUD operations and efficient backend communication.
- Developed responsive UI with search and dashboard features using React.
- Structured relational database schema for users, books, and transactions.

Interactive Wall Calendar Web Application

Next.js, React.js, Tailwind CSS, date-fns

Live Demo — GitHub

- Developed a modern, responsive wall calendar web application inspired by physical calendar design.
- Implemented dynamic date range selection with visual highlighting for start, end, and intermediate dates.
- Designed month-based dynamic hero images with smooth transitions to enhance user experience.
- Built reusable React components for calendar grid, navigation, and notes management.

- Integrated localStorage to persist user notes across sessions without backend support.
- Ensured fully responsive design using Tailwind CSS for seamless experience across devices.

Eco Quality Checker System

Arduino Uno, ESP32, DHT Sensor, Turbidity Sensor, Smoke Sensor, IoT Dashboard

- Developed an IoT-based environmental monitoring system to analyze air and water quality parameters in real time.
- Integrated DHT, turbidity, smoke, and humidity sensors with Arduino Uno and ESP32 modules for data collection.
- Designed and implemented a live dashboard to visualize sensor readings and environmental conditions.
- Enabled wireless data transmission using ESP32 for remote monitoring and efficient data updates.
- Improved understanding of embedded systems, sensor interfacing, and IoT-based communication.

Achievements

- Solved 150+ problems on LeetCode (Data Structures & Algorithms)
- Strong grasp of problem-solving techniques: Arrays, Strings, Binary Search, Recursion, Bit Manipulation
- Active participant in competitive programming (Achieved 1500+ ratings in weekend tests).

Certifications

- Completed Full Stack Web Development certification from Udemy, covering React, Node.js, Express.js, and PostgreSQL.
