

Komal Gana Naga Soma Sai Manoj Mathamsetti

Sricity, Andhra Pradesh

komalmathamsetti@gmail.com — +91 8885489886 — Portfolio — GitHub — LeetCode

Summary

ECE undergraduate at IIIT Sri City (CGPA: 8.43) with strong interest in Software Development. Skilled in C++, Data Structures & Algorithms, and full-stack development (React, Node.js). Actively building real-world projects and seeking SDE opportunities.

Education

Indian Institute of Information Technology, Sri City	2023 – 2027
B.Tech in Electronics and Communication Engineering	
CGPA: 8.43/10	
Tirumala Junior College	2021 – 2023
Intermediate	
Percentage: 97.2%	

Skills

- **Languages:** C++, JavaScript, Python
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, OS, CN
- **Web:** React.js, Node.js, Express.js, REST APIs, HTML, CSS
- **Databases:** PostgreSQL
- **Tools:** Git, GitHub, Postman

Projects

AI Incident Room

React.js, Node.js, Express.js, PostgreSQL, Socket.IO, LLM Integration

Live Demo — GitHub

- Built a GenAI-powered incident management platform for real-time monitoring, tracking, and resolution of operational incidents.
- Leveraged Large Language Models (LLMs) to summarize incident timelines, extract critical updates, and generate actionable insights from incident logs.
- Developed an AI assistant that transforms unstructured incident reports into concise summaries, improving situational awareness for responders.
- Implemented WebSocket-based real-time communication using Socket.IO to synchronize incident updates across multiple users.
- Engineered RESTful APIs and PostgreSQL-backed data models to support scalable incident storage, retrieval, and analytics.

SkillSphere – Freelancer Marketplace

React.js, Node.js, Express.js, PostgreSQL, Socket.IO, JWT

GitHub

- Developed a full-stack freelancer marketplace connecting clients with freelancers through job postings, proposals, and real-time collaboration.
- Implemented secure JWT-based authentication with role-based access control for Clients and Freelancers using bcrypt password hashing.
- Designed RESTful APIs for user management, job postings, proposal submission, messaging, reviews, and profile management using Express.js and PostgreSQL.
- Built responsive dashboards with real-time chat, online status, typing indicators, message editing/deletion, and notifications using Socket.IO.
- Engineered a scalable PostgreSQL database schema to efficiently manage users, jobs, proposals, conversations, reviews, and platform activities.

HomeFeast – Homemade Food Tiffin Service Platform

React.js, Node.js, Express.js, PostgreSQL, JWT, Tailwind CSS

GitHub

- Developed a full-stack platform connecting customers with verified home cooks for ordering homemade meals and subscription-based tiffin services.
- Implemented secure authentication and role-based access control (Admin, Cook, Customer) using JWT and bcrypt.
- Designed RESTful APIs for meal management, order processing, subscriptions, and user dashboards with PostgreSQL integration.
- Built responsive dashboards for customers, cooks, and administrators with real-time order and profile management features.
- Structured a scalable relational database schema to efficiently manage users, meals, orders, subscriptions, and transactions.

Achievements

- Solved 220+ problems on LeetCode (Data Structures & Algorithms)
- Strong grasp of problem-solving techniques: Arrays, Strings, Binary search, Recursion ,Bit Manipulation
- Active participant in competitive programming (Achieved 1500+ ratings in weekend tests).

Certifications

- Completed Full Stack Web Development certification from Udemy, covering React, Node.js, Express.js, and PostgreSQL.
